

EMH Systems and Prevention at Sea Announce Strategic Partnership to Revolutionize Maritime Compliance and Efficiency

New York, NY & Larnaca, Cyprus– EMH Systems, a leader in environmental compliance solutions for the maritime sector, and Prevention at Sea, a renowned maritime firm specializing in risk prevention and software innovation, are excited to announce a strategic partnership. This collaboration marks a significant milestone in maritime technology and services, offering an industry leading solution to fleets around the globe.

Innovative Collaboration for Enhanced Maritime Solutions

The partnership combines EMH Systems' expertise in environmental compliance and advanced technology with Prevention at Sea's state-of-the-art MORSE ship logbook software. This synergy will lead to the development of a unified system that integrates EMH Systems' Environmental Compliance Assistance Platform (ECAP) with Prevention at Sea's electronic logbooks. The result is a comprehensive solution that ensures operational efficiency, adherence to environmental regulations, timely alert, efficient planning and accuracy in recording logbook related tasks.

A Leap Forward in Maritime Environmental Compliance

"Joining forces with Prevention at Sea aligns perfectly with our mission to offer cutting-edge, user-friendly solutions for the maritime industry," said Christopher Nagy, CEO of EMH Systems. "This partnership not only enhances our platform's capabilities but also extends our reach in making maritime operations more environmentally responsible and efficient."

Petros Achtypis, CEO of Prevention at Sea, added, "This collaboration with EMH Systems is a game-changer. It allows us to offer about 2000 ships an integrated approach to maritime compliance and risk management, leveraging the best of both companies' innovations."

Anticipated Benefits for the Shipping Industry

The unified system will provide shipping companies with a tool that simplifies compliance with environmental regulations, reduces the risk of human error logbook recordings, supports companies and officers being sustainable while avoiding substantial penalties, and vessel detentions, as well as enhancing overall fleet performance and cost effectiveness. The partnership promises to set new standards in maritime operations and decision making focusing on ESG.

About EMH Systems

EMH Systems is a BV certified company, founded by vessel officers and industry professionals, offering a sophisticated platform designed to streamline environmental compliance in the maritime sector. EMH Systems delivers effective solutions for reducing pollution and illegal ship discharges, ensuring maritime operations are both environmentally conscious and compliant.

About Prevention at Sea

Prevention at Sea is an LR certified maritime firm acclaimed for its innovative software products and maritime advisory services. Focusing on risk prevention and operational excellence, the company offers software solutions and maritime services that optimize fleet performance, prevent human error, and ensure regulatory compliance.
